Killer app. I just install it on my computer and monitor. I've now been playing it all day and the screen hasn't gone blank even though it's night time. I play a game of pass the parcel then I open this app and the screen stays lighted. What I like Simple app and works really well. What I don't like Nothing. Advantages Very well done. Disadvantages Used to come from the USA and it was the old Alice app. This was so good I got it on a Windows 10 laptop. I would love to see a real time version of this program. Advantages Disadvantages Decent game, but takes forever to load on new windows installs due to the size and lack of useful features in the ui What I like Nice graphics/colours. What I don't like I don't know, I don't use this game so can't comment on this Advantages Disadvantages very useful, but can be played in game mode What I like The sleep timer is really useful, and works really well. Also the ability to put it in sleep mode
