Proof that there are an infinite number of functions that map \mathbb{R} to \mathbb{Q} My teacher told me to prove that there are an infinite number of functions that map \mathbb{R} to \mathbb{Q} . However, he couldn't give me a hint, I'm not really sure how to go about it, so I wanted to see if I could get some suggestions. A:

A phase II study of single-agent paclitaxel in patients with advanced non-small cell lung cancer who have previously received platinum-based chemotherapy. Patients with non-small cell lung cancer (NSCLC) who have failed platinum-based

chemotherapy are considered to have a poor prognosis, and alternative agents are urgently needed. A phase II study of single-agent paclitaxel (Taxol, Bristol-Myers Squibb, New York, NY, USA) was conducted in patients with advanced NSCLC who had received no prior chemotherapy for metastatic disease. In this dose-escalation study, a paclitaxel dose

of 225 mg/m² was administered as a 3-h infusion every 3 weeks. Forty-three patients were treated.

Response was evaluated in 40 patients by computed tomography (CT) scan. The median time to disease progression was 6.7 months and the median survival duration was 9.8 months. Two complete and four partial responses were observed; seven patients had stable

disease. The median number of cycles administered was two. Dose-limiting toxicities (DLTs) were observed in four patients at a paclitaxel dose of 225 mg/m². At a dose of 200 mg/m², the maximum-tolerated dose (MTD), DLTs were observed in three patients. This paclitaxel regimen was well tolerated, and a high response rate was observed in NSCLC patients

who had not been previously treated with platinum-based therapy. Cutting tool assemblies are employed in a variety of applications including cutting and milling.
